

**Amendments to the Claims:**

The following listing of claims will replace all prior versions and/or listings of claims in the application.

**Listing of Claims:**

1. (Currently amended) A grill configured to be mounted on a surface of a fan or fan housing, the grill comprising;

a substantially planar portion;[[,]] and

a handle extending out of the substantially planar portion so as to extend away from the surface of the fan or fan housing when the grill is mounted thereon;

wherein the substantially planar portion of the grill comprises an opening configured to receive a handle of a substantially similar grill when stacked on top of the substantially similar grill such that the substantially planar portions of the stacked grills are substantially parallel when the grills are stacked;

wherein the opening is substantially coplanar with the substantially planar portion.

2. (Original) The grill of Claim 1, wherein said substantially planar portion comprises a plurality of apertures.

3. (Currently amended) The grill of Claim 2, wherein at least ~~some~~ two of said plurality of apertures are arranged in a grid.

4. (Currently amended) The grill of Claim 1, wherein said substantially planar portion comprises at least one shaped wire arranged to form a loop or partial loop.

5. (Currently amended) The grill of Claim 4, wherein said substantially planar portion comprises a plurality of said loops or partial loops.

6. (Currently amended) The grill of Claim 5, wherein said substantially planar portion comprises at least one strut, each strut attached to at least one of said loops or partial loops in at least one place.

7. (Cancelled).

8. (Currently amended) The grill of Claim 1, wherein the handle comprises a first piece of wire extending in a loop or partial loop away from said substantially planar portion.

9. (Original) The grill of Claim 8, wherein said handle comprises at least one additional piece of wire, each additional piece of wire being shaped such that it is substantially parallel to said first piece of wire over the length of that additional piece of wire.

10. (Cancelled).

11. (Currently amended) The grill of Claim 1, further comprising one or more mounting formations for mounting the grill on ~~[[a]]~~ the fan or fan housing.

12. (Currently amended) The grill of Claim 11, wherein at least one of the mounting formations comprises shaped wire extending away from said substantially planar portion and arranged to form a loop or partial loop.

13. (Cancelled).

14. (Cancelled).

15. (Currently amended) The grill of Claim 6, further comprising at least one mounting formation for mounting the grill on [[a]] the fan or fan housing, and wherein at least one mounting formation and strut are integrally formed from a piece of shaped wire.

16. (Currently amended) The grill of Claim 6, further comprising at least one mounting formation for mounting the grill on [[a]] the fan or fan housing, and wherein at least one mounting formation and strut and a portion of said handle are integrally formed from a piece of shaped wire.

17. (Currently amended) A grill according to Claim 1, wherein the grill comprises:  
a section of wire shaped to form at least one loop or partial loop arranged in a common plane, including an outermost loop or partial loop;  
a section of wire shaped to provide support for each loop or partial loop;  
a first section of wire shaped to form a handle portion; and  
at least one ~~mount~~ mounting formation.

18. (Original) The grill of Claim 17, wherein the section of wire forming the handle portion extends away from said common plane, and wherein either end of that section wire is attached to said outermost loop.

19. (Currently amended) The grill of Claim 17 ~~comprising two mounts~~ wherein the at least one mounting formation comprises at least two mounting formations formed from shaped wire, said ~~two mounts~~ at least two mounting formations and said handle portion being formed from a common section of wire.

20. (Original) The grill of Claim 17, wherein said handle portion comprises at least one additional section of wire.

21. (Original) The grill of Claim 20, wherein the first section of wire and the additional sections of wire forming said handle portion are joined together with a weld or a brazing.

22. (Currently amended) The grill of Claim 17, wherein ~~a support and a mount~~ the section of wire shaped to provide support and at least one mounting formation are formed from a common section of wire.

23. (Original) The grill of Claim 17, comprising further sections of wire shaped to form further loops or partial loops arranged in said common plane.

24. (Original) The grill of Claim 17, comprising further sections of wire arranged to provide further support for the at least one loop or partial loop.

25. (Currently amended) The grill of Claim 24, wherein two of the sections of wire arranged to provide support for the at least one loop or partial loop define said opening ~~an aperture~~ in said fan grill, ~~the aperture~~ said opening being configured to receive the handle of a second, similar fan grill.

Claims 26-28 (Cancelled)

29. (New) A grill configured to be mounted on a surface of a fan or fan housing, the grill comprising:

a substantially planar portion; and

a handle extending out of the substantially planar portion so as to extend away from the surface of the fan or fan housing when the grill is mounted thereon;

wherein the handle comprises a first piece of wire extending in a loop or partial loop away from said substantially planar portion;

wherein said handle comprises at least one additional piece of wire, each additional piece of wire being shaped such that it is substantially parallel to said first piece of wire over the length of that additional piece of wire; and

wherein each additional piece of wire is attached to said first piece of wire with at least one weld or brazing.

30. (New) A grill configured to be mounted on a surface of a fan or fan housing, the grill comprising:

a substantially planar portion;

a handle extending out of the substantially planar portion so as to extend away from the surface of the fan or fan housing when the grill is mounted thereon; and

one or more mounting formations for mounting the grill on the fan or fan housing;

wherein the at least one mounting formation and a portion of said handle are integrally formed from a single piece of shaped wire.

31. (New) The grill of claim 30, wherein the substantially planar portion of the grill comprises an opening configured to receive a handle of a substantially similar grill when stacked on top of the substantially similar grill such that the substantially planar portions of the stacked grills are substantially parallel when the grills are stacked.

32. (New) A grill configured to be mounted on a surface of a fan or fan housing, the grill comprising:

a substantially planar portion; and

a handle extending out of the substantially planar portion so as to extend away from the surface of the fan or fan housing when the grill is mounted thereon;

wherein said substantially planar portion comprises at least one shaped wire arranged to form a loop or partial loop;

wherein said substantially planar portion comprises a plurality of said loops or partial loops;

wherein said substantially planar portion comprises at least one strut, each strut attached to at least one of said loops or partial loops in at least one place; and

wherein at least one strut and at least a portion of said handle are integrally formed from a single piece of shaped wire.

33. (New) The grill of claim 32, wherein the substantially planar portion of the grill comprises an opening configured to receive a handle of a substantially similar grill when stacked on top of the substantially similar grill such that the substantially planar portions of the stacked grills are substantially parallel when the grills are stacked.

34. (New) The grill of claim 1,  
wherein the handle comprises a partial loop; and  
wherein a plane of the partial loop of the handle is substantially perpendicular to a plane of the substantially planar portion of the grill.

35. (New) The grill of claim 1, wherein the opening is configured to receive the handles of three or more substantially similar grills when stacked on top of the substantially similar grill such that the substantially planar portions of the stacked grills are substantially parallel when the grills are stacked.
